

# 3C SECURE NETWORK

Now you can have complete control and visibility of your own network

It's not just about Faster Deployment...

It's not just about going Wireless...

It's ALL about "Putting you in CONTROL!!"

3C Secure Network is a Secure Private Mobile Network, providing banks dedicated wireless private network for ATM fleet

## Best of Breed Wireless Technology

- **Unique end-to-end Architecture** – Built specifically for the financial transaction market
- **Highest Availability** – The architecture is designed over multiple carrier networks to give no single point of failure, delivering the most robust and reliable communications for your fleet
- **Carrier Agnostic** – Giving the best wireless connectivity for each ATM connection (utilizing multiple carriers in the country – providing the best carriers per site location)
- **Security** – 3CSN provides layers of security with multiple access requirements on a private networking infrastructure
- **Speed** - Utilizing the latest high-speed cellular services and fiber optic technology providing the highest fleet availability
- **Management** - 3CSN's BOSS fleet management system delivers fleet level real-time monitoring that intelligently identifies potential problems without overwhelming the operator. Real-time alerts and stats are available when they are needed
